Segment HEALTHCARE

Creating a better healing environment

Traditionally, Marmoleum is applied in both health and care facilities worldwide. Because Marmoleum is naturally bacteriostatic, it helps prevent the growth of bacteria on floors, thus it has always been considered the preferred health care floor solution. Topshield2, a protective layer applied

to Marmoleum, adds to bacteria prevention effectiveness. Not only do care providers want environments that are hygienic, they also want environments with aesthetics that aid the healing process. The use of comforting colour schemes and creating designs that convey a sense of well being are among the important attributes of a Marmoleum floor.

These kinds of environments are not limited to public hospitals or private clinics, however. Just as important are care facilities for the aged and assisted living environments. These places should be a home away from home that provide comfort and safety. That's why the entire Health Care portfolio of Forbo Marmoleum is designed to safely accommodate walking aids and wheelchairs and other equipment.

Flooring solutions in medical environments

Cost effectiveness and hygiene standards

Hospitals are buildings whose floors are tread by literally hundreds of people each day, while they also have to meet the very highest standards of hygiene. Where people are never keen to stay for very long, but nevertheless have to be made as welcome as possible. Where matters of life and death are commonplace, but where consideration still needs to be given to cost-effectiveness and environmental responsibility.

150 years of experience in the healthcare sector

Forbo has been developing floors for hospitals for over a century now. From the reception lobby to patients' rooms, from laboratory to operating theatre. We have extended experience with specific hospital needs and demands.

complete flooring solutions

We offer complete flooring solutions with products like Marmoleum, Colorex and high performance vinyl. Our very extensive range of linoleum and vinyl floor coverings makes it possible to give every room, paediatric ward and waiting area its own unique interior.

Linoleum collection overview

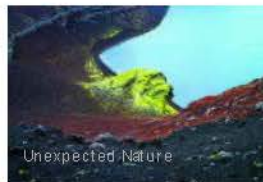

World leader in linoleum

Marmoleum, Forbo's brand of linoleum, stands for versatility, durability & sustainability. Marmoleum is a natural floor created from all natural ingredients. It is the most sustainable floor in the resilient flooring category. Besides this, Marmoleum is available in a wide range of radiant colours and comes in various structures. See below the possibilities.

All Marmoleum floors now include [Topshield2](#), a double UV cured finish that results in the lowest costs of ownership over its life time.

Our newest Marmoleum collection "The Next Generation of Marmoleum" offers a wide choice in colour and design. Besides the Marbled visuals we created new designs that resemble subtle concrete with fine colour nuances. Also we extended the vintage stripe design that has been recreated to suit modern environments. Creating a new perspective.

The Unexpected Nature of Linoleum contains 18 colours inspired by the beauty of nature.

Refined & powdery, the oxide pigments denote the natural dyes of madder and weld

12 unique Marmoleum floors developed by well known Dutch designers.

Our Touch floors have a unique embossed surface that gives a wonderful tactile experience.

Our Marmoleum Dual tiles collection offers numerous colour combinations.

6 Innovative floor designs produced in cooperation with the Italian architect Alessandro Mendini.

Our Marmoleum Sport collection is ideal for all kinds of sports facilities.

Marmoleum Acoustic offers enhanced comfort and sound reduction.

Marmoleum Ohm ex is designed to improve electrical conductivity.

Cork/linoleum is a warm, natural floor with impact-sound-reducing and shock-absorbing properties.

The matt surface and warm, soft texture of our DeskTop collection is the ideal finishing touch for furniture.

Ideally suited for use as notice board or as a functional finish to walls, door panels and furniture.

AquaJet cutting technology enables reproduction of the most intricate designs and allows for endless creativity.

The new Topshield2 finish is even more resistant to dirt pick-up, less prone to wear and has improved resistance to scratches and stains.

Project vinyl collection overview

Eternal general purpose vinyl

In our Eternal general purpose vinyl collection you'll discover a balanced range of wood-, stone- and abstract designs.

Luxury vinyl tiles

Exclusive luxury vinyl tiles with authentic finishes and distinctive touches that are all about texture.

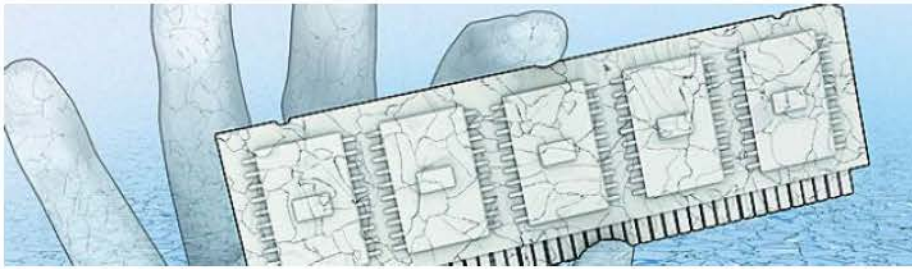

Acoustic vinyl

Our new Sarlon collection designed to achieve a complete acoustic flooring solution for any application.

Safety vinyl

Safety vinyl consists of highly durable vinyl floors, combining outstanding slip resistance with fresh colours and patterns.

Colorex ESD & cleanroom flooring

Is safe. Stays safe

Colorex is an advanced technical flooring system specifically designed to control static discharge in sensitive areas such as cleanrooms, operation theatres and the electronic industry. Not only does Colorex provide an advanced technical solution, it is also aesthetically pleasing, enhancing any commercial interior from industrial to educational establishments.

FAQ's

Entrance flooring systems

Entrance flooring is fundamental to modern building design: minimizing maintenance costs, protecting a building's flooring and environment from pollutants and dirt. And don't forget that your entrance is the first contact with a customer. With both textile (Coral) and rigid (Nuway) entrance systems in our portfolio, we can offer an entrance solution for every situation.

Coral

By stopping up to 94% of walked in dirt and moisture Forbo Coral can reduce cleaning costs by up to 65% and prolong the life of interior floor finishes and coverings. We offer a Coral solution for every application and area in various colours and designs.

Nuway

Nuway offers single and double-sided mats with different applications and benefits, also for heavy traffic entrances. Every single Nuway mat is manufactured to the customer's individual order.

Segment EDUCATION

Creating playful, colourful designs

Today's schools and educational facilities are multi-disciplinary buildings that house a large variety of spaces for learning along with social and cultural activities and sports. Marmoleum is the ideal floor solution that fits in the traditional classroom and hallways, and also has functional solutions for restaurant areas, atriums and sports halls.

Colour, in addition to interior form, space, light and texture, is also a major design element that can be used to create an inspirational learning environment. The rich palette of the Marmoleum Marbled and Patterned collections have a range of complementing colours that fit all stages of development for children whether they are playing or learning.

Flooring solutions in educational environments

Practical, extremely hardwearing and cost-effective floors

The physical environment has a strong influence on learning and floor coverings make an indispensable contribution to the quality of that environment. Few buildings (and even fewer floors!) get such tough treatment as those used in education. The floors must be attractive to look at as well as practical, extremely hardwearing and cost-effective.

Forbo floor coverings meet all these criteria – and several more. From crèches to universities, our solutions help to create better learning and working environments. They're attractive, safe and environmentally compatible, and they last for generations.

Safety vinyl consists of highly durable vinyl floors, combining outstanding slip resistance with fresh colours and patterns.

flotex[®] flocked flooring

Flotex combines the practicality of a resilient flooring with the slip resistant and acoustic properties usually associated with textiles. Being completely waterproof, Flotex is also the only truly washable textile floor covering. Thanks to the highly effective anti-microbial treatment [Sanitized®](#), Flotex offers constant protection against bacteria, including MRSA, E-coli and the development of dust mites.

Do you want more flexibility when installing your floor, then Flotex Tiles are your solution. All Flotex Tiles have a recycled backing.

The Flotex Classic designs are printed on the smooth even fibre surface, creating a wide variety of colours and designs.

Flotex HD represents the unique High Definition digital print collection that creates a superior texture with almost 3-D like appearance.

Aesthetically and technically ground breaking; a creative collaboration between Forbo Flooring and the Italian design studio Sottsass Associati.

Flotex Naturals is a special range of 16 designs that all deliver the appearance and apparent structure of a real wood or cork floor.

Textile

Our Textile collection consists of high quality tufted tiles and a comprehensive range of needle-punched carpets; our Needlefelt collection.

Our tufted carpet tiles with our brands Tessera and Westbond offer flexibility in design and installation, both broadloom and tessellated.

The robust, hard-wearing properties of Needlefelt make it ideal for installations that meet high traffic but also require a tranquil and harmonious atmosphere.

Acoustic performance

Turning down the volume; how does it work?

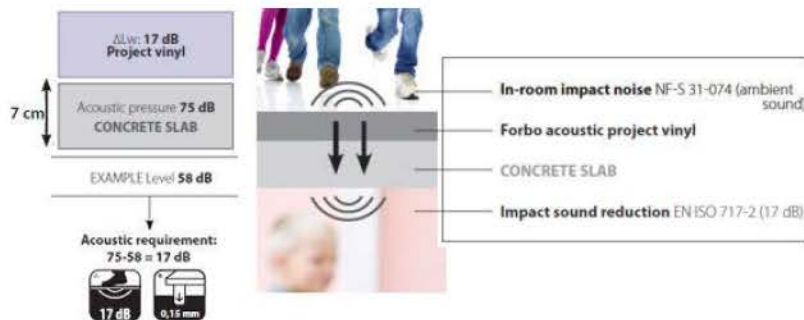

Sound is generated by almost all everyday activity. Impact sound is generated by traffic contacting the floor surface. It is therefore also the main area where a floor covering can influence acoustic performance.

Impact sound reduction

Impact sound made on the floor in 1 room is transmitted through the floor into rooms below. In order to measure the impact sound reduction achieved by a floor covering, impact noise is generated with a hammer machine directly onto the concrete floor slab in an emission room and the sound level (S1) is recorded in the reception room below.

The floor covering is then laid onto the concrete slab, the same impact noise is made on the floor covering, and the new sound level (S2) is recorded. The impact sound reduction (EN ISO 717-2) is the difference, measured in decibels, between the two sound levels recorded. The impact sound reduction of Forbo's acoustic floors ranges from 14 to 20dB (textile).

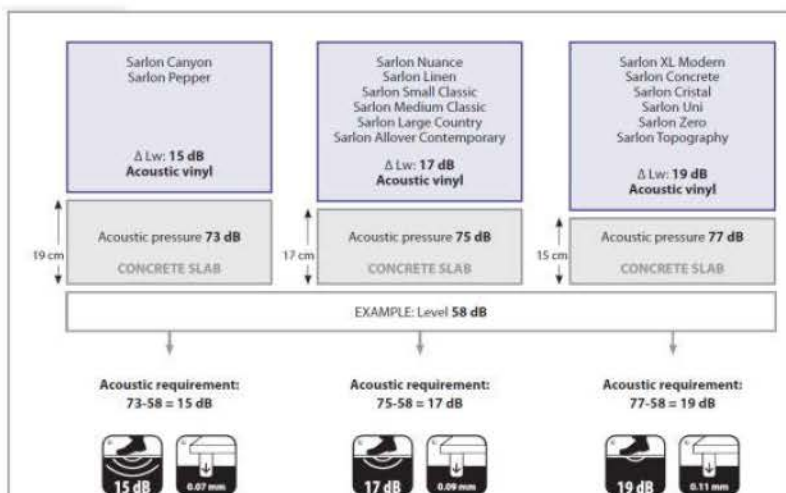

Below an example of Acoustic vinyl 17dB:

Adapt the floor covering to the building

The thickness of the concrete slab on which the acoustic floor coverings are fitted determines the minimum acoustic rating necessary for the floor covering to achieve the desired acoustic performance.

Below an example of our Acoustic project vinyl collection. Forbo is proud to offer the widest choice of acoustic vinyl floor coverings in one collection for all types of subfloors.

In-room impact noise

Airborne sound inside a room – ambient noise – is generated by impact noise in the room itself. To measure in-room impact noise, noise pressure is measured inside the room where the impact sound is generated, according to the standard NF-S 31-074. The measurements are classified into various categories, with Class A defining the best-performing floor coverings. All Forbo's acoustic project vinyl collections are in Class A.

CLASS	LEVEL $L_{n,e,w}$ IN dB	Floor covering
A	$L_{n,e,w} < 65$	<ul style="list-style-type: none">• cushion vinyls• acoustic project vinyls
B	$65 \leq L_{n,e,w} < 75$	<ul style="list-style-type: none">• resilient floor coverings,compact project vinyls
C	$75 \leq L_{n,e,w} < 85$	<ul style="list-style-type: none">• hard floor (laminates, wood, stone)
D	$85 \leq L_{n,e,w}$	<ul style="list-style-type: none">• hard floor floating installation

Segment RETAIL

Creating good design

Marmoleum has long been set free of its institutional image. Flooring installations for today's brands and chains of retail shops are proof that Marmoleum, with its new collections, helps create exceptional shopping experiences.

Vast colour and design choices, matched with outstanding durability, make Marmoleum the perfect floor for stores looking to enhance brand identity. And, thanks to its resilience, Marmoleum can easily handle high-traffic areas in department stores.

Flooring solutions in retail environments

Carefully developed concepts ensure the consistent style of a chain of shops or franchise organisations. This is shown through the selected assortment, the accompanying pricing, the point of sale material, the product presentation and the interior. Individual retailers frequently excel in individual and service-oriented shop concepts. They make themselves stand out by creating a distinctive range, a completely personal identity and an appealing shop interior.

In all cases, the floor has a big impact on the atmosphere of the shop. It should both support and strengthen the retail concept and completely fit in with the chosen housestyle.

Because they are durable, stylish and available in a large number of different designs, Forbo floor coverings help to create attractive and practical shopping environments. Floor designs can be readily adapted to any marketing concept or to the wishes of the individual retailer.

Our contemporary Furniture Linoleum is our warm and tactile furniture surfacing material that enables a unique identity for each retail design.

Segment OFFICES

Creating inviting office spaces

Modern office environments bear no resemblance to the large, institutional buildings that housed civil servants and administrative employees behind milky glass doors in small workspaces behind conventional desks. Light and colour have entered the workspace, creating aesthetically creative and pleasing surroundings with excellent acoustic qualities.

The new ranges of the Marmoleum Solid designs create serene, stylish environments that fit the modern office space. Traditional classics can be mixed with modern accents and contemporary colours for light and pleasant working environments.

Flooring solutions in office environments

Your office is another form of business card. The interior contributes to setting the tone of your organisation, to its market image and to the impact that is made on existing and potential employees. Naturally, the choice of floor covering plays a crucial role in the image-making process. The floor is, after all, the logical starting point of every professional interior design.

Bulletin Board is our linoleum notice board material that facilitates simple, efficient communication.

Our contemporary Furniture Linoleum is our warm and tactile surfacing material for all kinds of office furniture, from executive offices to reception desks.

All our solutions help you to create motivating, inspiring and safe working environments. They fit in excellently into every office interior, whether in the company's reception area, offices or restaurant, or in heavily trafficked areas, such as corridors and lifts.

Segment LEISURE & HOSPITALITY

Creating a sustainable alternative
 The choices offered in the different designs of the Marmoleum collection create modern functional environments in the world of leisure and hospitality. Theatres, cinemas, hotels and restaurants all have their different environments and character. The dual functionality of a Marmoleum floor is the perfect solution.

Marmoleum colours and structures, with references to wood and stone, which are available in the new collection, form an ideal base for creating warm, natural environments in which floors act as a neutral element and a solid base for the interior.

Flooring solutions in hospitality & leisure facilities

Carefully developed concepts ensure consistent style of a hotel chain, restaurant or leisure facility. The floors must be attractive as they have an impact on the atmosphere of the room. Any floor should both support and strengthen the hotel concept and completely fit in with the chosen style.

Forbo floor coverings are durable, stylish and available in a large number of different designs, they help to create a relaxed and homelike and professional environments. Forbo's extensive ranges of floor covering options make it possible to give every room its own unique character.

Flotex combines the practicality of a resilient flooring with the slip resistant and acoustic properties usually associated with textiles. Being completely waterproof, Flotex is also the only truly washable textile floor covering. Thanks to the highly effective anti-microbial treatment [Sanitized®](#), Flotex offers constant protection against bacteria, including MRSA, E-coli and the development of dust mites.

Do you want more flexibility when installing your floor, then Flotex Tiles are your solution. All Flotex Tiles have a recycled backing.

The Flotex Classic designs are printed on the smooth even fibre surface, creating a wide variety of colours and designs.

Flotex HD represents the unique High Definition digital print collection that creates a superior texture with almost 3-D like appearance.

Aesthetically and technically ground breaking; a creative collaboration between Forbo Flooring and the Italian design studio Sottsass Associati.

Flotex Naturals is a special range of 16 designs that all deliver the appearance and apparent structure of a real wood or cork floor.

Textile

Our Textile collection consists of high quality tufted tiles and a comprehensive range of needle-punched carpets; our Needlefelt collection.

Our tufted carpet tiles with our brands Tessera and Westbond offer flexibility in design and installation, both broadloom and tessellated.

The robust, hard-wearing properties of Needlefelt make it ideal for installations that meet high traffic but also require a tranquil and harmonious atmosphere.

Entrance flooring systems

Entrance flooring is fundamental to modern building design: minimizing maintenance costs, protecting a building's flooring and environment from pollutants and dirt. And don't forget that your entrance is the first contact with a customer. With both textile (Coral) and rigid (Nuway) entrance systems in our portfolio, we can offer an entrance solution for every situation.

Coral

By stopping up to 94% of walked in dirt and moisture Forbo Coral can reduce cleaning costs by up to 65% and prolong the life of interior floor finishes and coverings. We offer a Coral solution for every application and area in various colours and designs.

Nuway

Nuway offers single and double-sided mats with different applications and benefits, also for heavy traffic entrances. Every single Nuway mat is manufactured to the customer's individual order.

Linoleum collection overview

World leader in linoleum

Marmoleum, Forbo's brand of linoleum, stands for versatility, durability & sustainability. Marmoleum is a natural floor created from all natural ingredients. It is the most sustainable floor in the resilient flooring category. Besides this, Marmoleum is available in a wide range of radiant colours and comes in various structures. See below the possibilities.

All Marmoleum floors now include [Topshield2](#), a double UV cured finish that results in the lowest costs of ownership over its life time.

Our newest Marmoleum collection "The Next Generation of Marmoleum" offers a wide choice in colour and design. Besides the Marbled visuals we created new designs that resemble subtle concrete with fine colour nuances. Also we extended the vintage stripe design that has been recreated to suit modern environments. Creating a new perspective.

Unexpected Nature

The Unexpected Nature of Linoleum contains 18 colours inspired by the beauty of nature.

Marmoleum Oxide

Refined & powdery, the oxide pigments denote the natural dyes of madder and weld

Marmoleum Dutch Design

12 unique Marmoleum floors developed by well known Dutch designers.

Our Touch floors have a unique embossed surface that gives a wonderful tactile experience.

Our Marmoleum Dual tiles collection offers numerous colour combinations.

6 Innovative floor designs produced in cooperation with the Italian architect Alessandro Mendini.

Our Marmoleum Sport collection is ideal for all kinds of sports facilities.

Marmoleum Acoustic offers enhanced comfort and sound reduction.

Marmoleum Ohm ex is designed to improve electrical conductivity.

Corkinoleum

Corkinoleum is a warm, natural floor with impact-sound-reducing and shock-absorbing properties.

Furniture Inoleum

The matt surface and warm, soft texture of our DeskTop collection is the ideal finishing touch for furniture.

Bulletin Board

Ideally suited for use as notice board or as a functional finish to walls, door panels and furniture.

Aquajet designs

Aquajet cutting technology enables reproduction of the most intricate designs and allows for endless creativity.

The new Topshield2 finish is even more resistant to dirt pick-up, less prone to wear and has improved resistance to scratches and stains.

Project vinyl collection overview

Eternal general purpose vinyl

In our Eternal general purpose vinyl collection you'll discover a balanced range of wood-, stone- and abstract designs.

Luxury vinyl tiles

Exclusive luxury vinyl tiles with authentic finishes and distinctive touches that are all about texture.

Acoustic vinyl

Our new Sarlon collection designed to achieve a complete acoustic flooring solution for any application.

Safety vinyl

Safety vinyl consists of highly durable vinyl floors, combining outstanding slip resistance with fresh colours and patterns.

Textile

Our Textile collection consists of high quality tufted tiles and a comprehensive range of needle-punched carpets; our Needlefelt collection.

Our tufted carpet tiles with our brands Tessera and Westbond offer flexibility in design and installation, both broadloom and tessellated.

The robust, hard-wearing properties of Needlefelt make it ideal for installations that meet high traffic but also require a tranquil and harmonious atmosphere.

Solutions in industrial environments

Forbo stands for guaranteed performance in all kinds of industrial environments, ranging from electronic and pharmaceutical production areas to laboratories.

Forbo Flooring offers a complete range of flooring products with antistatic, acoustic, conductive, water-resistant, slip-resistant, bacteriostatic and bactericidal properties. The Forbo range includes total solutions for virtually any type of situation.

Electronic industry

Production and assembly of ESD sensitive floors.

Pharmaceutical industry

Sterile production, aseptic areas for packaging and clean zones such as laboratories, R&D, storage.

Health care

Operating theatres, intensive care units, imaging diagnostics.

General industry

Food processing, optical industry, aeronautics and space automotive (e.g. dust free car painting facilities).

Floors for the electronic industry

Products: Colorex SD, Colorex EC, Colorex EC Plus

The right floor makes the difference

Reducing the generation of electrostatic charges is the main purpose of control measures in ESD protected areas (EPA). In such areas like electronics assembly, mechatronics and datacenters, the right floor covering plays a crucial role. It does not only drain electrostatic charges from personnel and equipment, but it also reduces the generation of charges there where they occur, at the interface between the shoe soles and the floor.

Consistent conductivity throughout the entire life time of the floor

The unique construction of Colorex EC and Colorex SD, completely free from volatile antistatic chemicals, ensures a permanent and stable conductive performance of the floor over its entire life time, totally independent from humidity and temperature..

We guarantee more than resistance

Forbo Flooring guarantees highest safety. We measure the electrical resistance of every single production batch of Colorex EC and Colorex SD and deliver upon request a test report clearly showing the results of our measurements.

Low body voltage generation

It is a natural fact that anybody can accumulate electrostatic charge just by simple motion or walking. By wearing the appropriate ESD shoes however, these charges will be securely drained through the dense network of conductive veins of Colorex EC and Colorex SD.

Image gallery

The cleanroom flooring

In cleanroom environments in the pharmaceutical, life sciences and manufacturing industries, airborne particles can be a major source of contamination. Not only can they cause yield loss, the particles can also lead to corrosion and product degradation. ISO standards and cGMP regulations for air purity require you to comply by presenting consistent results that can be verified on a regular basis. Colorex can help here. Suitable products are Colorex SD, Colorex EC and Colorex EC plus.

Ideal for cleanrooms in these kinds of environments, Colorex satisfies the strictest requirements for particle release behaviour, helping to reduce any threat of contamination. What's more, following a comprehensive programme of testing, its suitability in cleanroom applications has been certified by the renowned Fraunhofer IPA Institute in Germany.

Hygiene and safety for sensitive hospital areas

Products: Colorex ECA-plus, Colorex SD

A demanding area

In sensitive hospital areas such as operating theatres, intensive care units and imaging diagnostic facilities, flooring presents its own unique challenges. Not only must it comply with stringent hygiene regulations to help prevent hospital-acquired infections, it must also demonstrate that it meets any necessary safety requirements. And most importantly, it must prevent any electrostatic discharges as these can cause malfunctions, or even failures, in highly sensitive medical equipment and devices.

The highest standards of hygiene

Colorex satisfies all these requirements. Its conductive properties allow you to avoid the negative effects of an accumulation of static electricity. At the same time, the compact, pore-free surface is unfriendly to bacteria and moulds, helping you to maintain the highest standards of hygiene. And thanks to its excellent stability and consistent high quality, its aesthetic appeal won't be tarnished by the regular cleaning and disinfecting cycles that are imperative in hospital environments. Colorex is highly stain resistant helping to ensure your investment will still look good in years to come.

Industrial flooring for wear intensive areas

Products: Colorex SD+plus, Colorex Basic+plus, R11 plus

Suitable for the toughest settings

Industrial environments present their own flooring issues, particularly in areas with high wear and tear. Our Colorex high performance floor covering systems are designed for all industrial areas, including the toughest of settings. Cut from a homogeneous, solid block of highly compressed material they have a high vinyl content and a well balanced amount of mineral filler for optimum performance.

Colorex offers you:

- High mechanical resistance and wear with no need for factory coating or additional surface hardening treatments
- Excellent chemical resistance thanks to the pore-free surface and a remarkably low percentage of plasticiser
- A 100% repairable and restorable solution that leaves no trace of abrasive treatment methods

The Colorex system

Choose here the level of conductivity that fits best in your application. Colorex can be used everywhere. It can be installed by directly glueing it on concrete, as part on top of a raised floor panel or as a loose lay tile system. All versions come in two levels of conductivity: EC Highperformance and SD Performance. The loose lay version additionally has an anti static (Basic plus) and slip resistant (R11 plus) version to complete the high tech solutions offer.

Click on the images to find more information for each level.
